

The Teacher-Child Interaction includes the following activities:

1 Greeting Ritual:

The day begins with the teacher greeting the children with a song in which each child's name is taken by the teacher to welcome him /her. Through this activity the children feel welcomed, valued and cared.

2 S.E.W:

The day starts with S.E.W- which means Special Skill of the day, everything about day and date and weather discussion between the teacher and the children. This gets them started with discussions with their friends and the teacher.

October-2020						
Sunday	Monday	Tuesday	Wednesday	Thursday	Friday	Saturday
				1	2	3
4	5	6	7	8	9	10
11	12	13	14	15	16	17
18	19	20	21	22	23	24
25	26	27	28	29	30	31

3 Discussion Starters:

A brilliant activity to support children's communication where the children discuss about a topic given by the teacher like my favourite toy, -shirt and so on with their class friends thereby building their language, social-emotional skills and confidence too.

4 Numeracy /Literacy:

Learning letters and their sounds or Number and their value has always been fun. The learning happens through stories, puppets, movement and interactions that keeps the child physically and mentally engaged.

5 Understanding the World:

The various concepts are discussed with children through stories, interactive teaching aids games and discussions through which children understand the world around them which so very relevant now since children cannot go out and explore the world around them outside.

6 Rhyme time:

Children have fun singing rhymes and songs with interactive teaching aids used by the teacher and as well engaging children through various actions and bodily movements. Further singing involves both the right and left brain of the child thus leading to whole brain development.

7 Activity Time:

The worksheet for the day is explained and demonstrated by the teacher to children. The activity is then done by the child during the teacher –Child Interaction time along with his/her friends.

8 Fun with Games:

Games that involve the children in play as they make sounds, do actions, listen, think and have fun.

9 Young Scientist:

Children twice a month organise the given materials for the experiment and virtually do the experiment hands on along with the teacher contributing to the development of their thinking. The Young Scientist activity involves the use of all the 3 parts –Brain, Senses and Muscles in children for learning to happen.

10 Fun with Storytelling:

Children enjoy listening stories and thus every week the teacher conducts a story telling session using books, role play, drama and teaching aids.

11 Fantastic Virtual Field Trips:

Every month children are taken on a Fantastic Virtual field trips to experience the outside world virtually and strengthen the concepts learnt. The Virtual field trips are conducted to places like a farm, Jungle to see animals and birds, under the ocean and so on.

12 Virtual classroom:

We have also created a Virtual classroom for children so that they develop a feeling of belonging to their classroom which leads them to various activities for the day. The classroom has an avatar of the teacher which makes the virtual classroom more fun and innovative for children.

13 Event Celebrations:

All events like colour day, festival celebrations are celebrated virtually with children and parents with fun interactive activities. The festivals celebrated are focussed towards development of life skills in children.

Thus, Jumbo's Play Engine-Home School Play and Learning Connection at Podar Jumbo Kids ensures children during this pandemic get their daily dose of fun, connections, health and hygiene to ensure that children are happy and engaged and are not missing out on any learning activities. When children can't come to Kindergarten, the Kindergarten comes home in a developmentally appropriate manner!

Happy children are Healthy children and Happy children made a Happy and Healthy Family. We make children Happy through our Jumbo's Play Engine-Home School Play and Learning Connection.
